York Way - Bus stop works

As part of Camden's ongoing commitment to bus priority, Camden's contractor, Volker Highways, and TfL Buses will be installing a new bus stop on York Way just south of Crinan Street, for buses travelling towards Archway.

The new bus stop is needed to replace the existing bus stop opposite Copenhagen Street, which will be closed on the 20th of September. This is due to ongoing construction for the Kings Cross Central development. The footway on the western side of York Way will be closed to enable the construction of a new housing block. A new wider footway and bus stop will eventually be provided once construction is complete.

Implementation of the new bus stop just south of Crinan Street will involve installing a new bus stop sign on the footway and installing a yellow bus stop marking on the carriageway. This will take one day to complete.

If the weather allows, works will happen on September 4th 2009.

Due to the delays to general traffic travelling north of York Way, double yellow lines will be installed on York Way between Goods Way and Wharfdale Road on the western side of the road. This will remove parking in the evenings and weekends to improve the flow of traffic in this location. These works will be done approximately during the week starting Monday 28th October 2009.

If you have any queries, please contact Bec Hayes on the number above.

We thank you for your help in assisting our contractor to carry out these necessary works.

Yours sincerely

PP Alex Djan
Manager, Traffic Engineering Team
